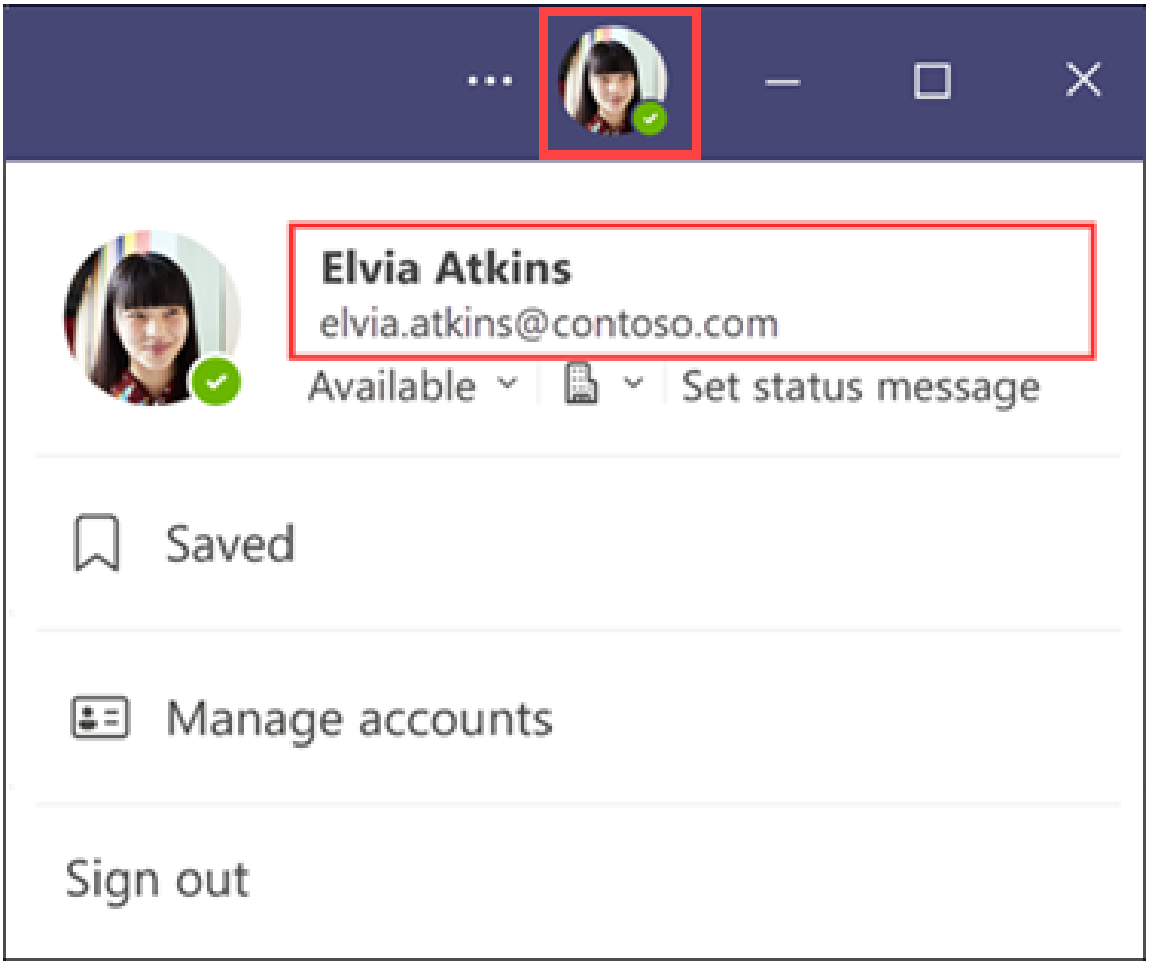
Activity Overview

This guidance details how to change your pronoun in **Microsoft Teams**.

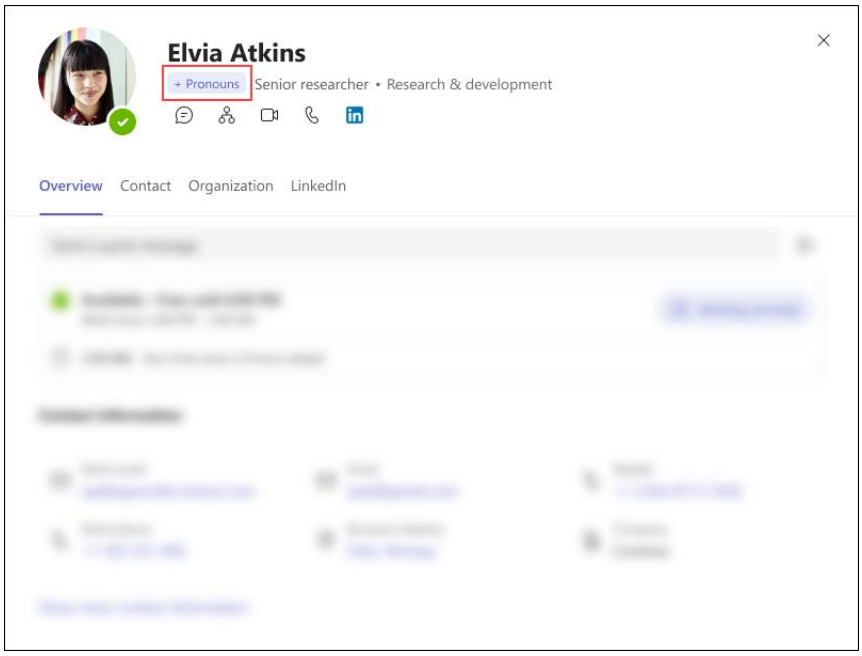
Please note that selecting a pronoun in **Microsoft Teams** is optional.

Step by Step Procedure

1. Select your profile picture in the upper right corner of **Microsoft Teams**, then select your name/email address on your profile card.

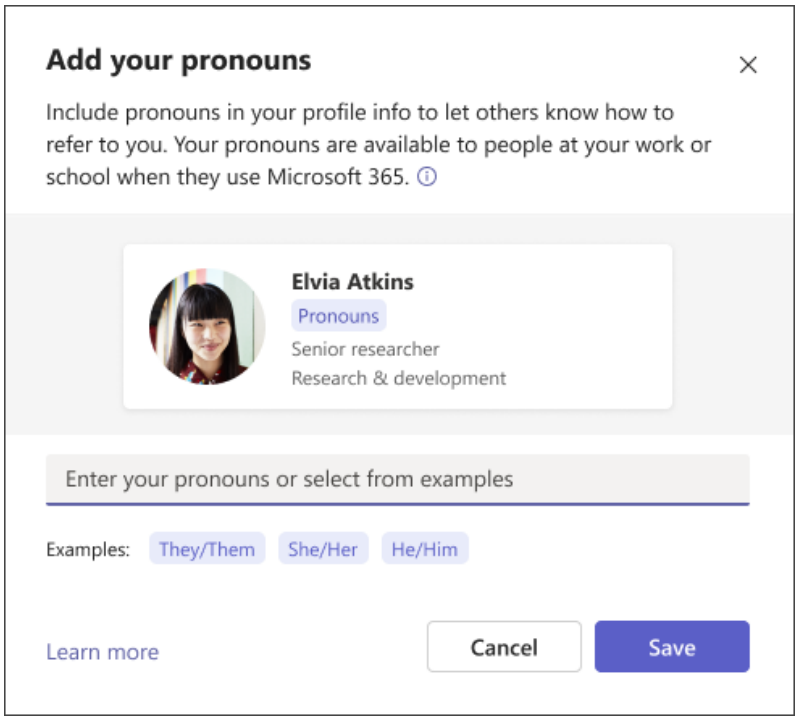


2. On your profile card, select **+ Pronouns** (if you've chosen pronouns in **Microsoft Teams** before they will be stated here instead).

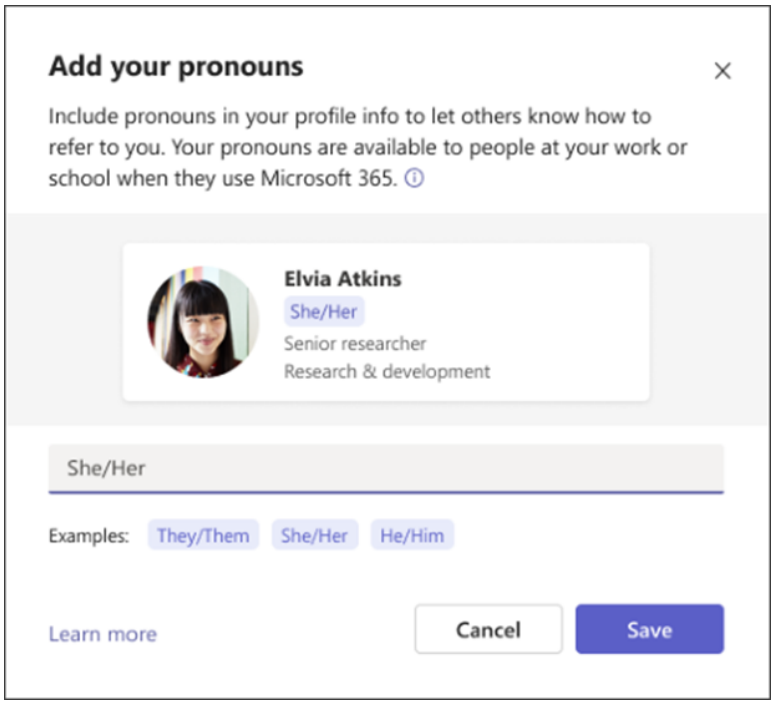


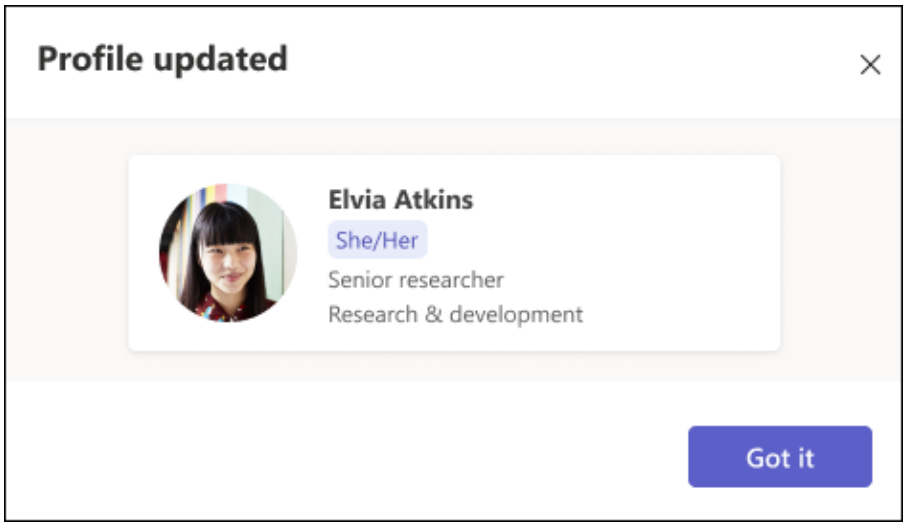
3. To **add** or **change** your pronouns, select from the examples, or enter your own. To **delete** simply remove your pronouns.

   Note: Pronouns must be 60 characters or less, including spaces.



4. Select **Save** to update your profile. Select **Cancel** if you do not want to save your changes. In the example below, Elvia Atkins has chosen **She/Her** as her pronouns. Changes are updated and reflected on your profile card immediately after you select **Save**.





5. Select **Got it** to exit the confirmation dialog.
